PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on internship experience building production-grade full-stack web and mobile platforms. Proficient in MongoDB, Express.js, ReactJS, Node.js, JWT authentication, RBAC, RESTful API design, and third-party integrations (Razorpay, Firebase). Currently pursuing M.Sc. Computer Science at Fergusson College, Pune. Passionate about scalable architecture and clean code.

EXPERIENCE

MERN Stack Developer – Intern | AB Software Solution | Mar 2025 – Present

- Built PINCHI – a Community Support & Vendor Engagement Platform (Web + Android) using the full MERN stack.
- Designed and developed RESTful APIs for role-based modules (Member, Vendor, Expert, Admin) with JWT authentication and RBAC.
- Integrated Razorpay payment gateway for vendor subscription plans, including automated invoice generation.
- Built Anonymous Query System with unique ID generation, expert assignment workflow, and real-time status tracking.
- Integrated Firebase Cloud Messaging (FCM) for push and in-app notifications across web and Android platforms.

PROJECTS

Learning Management System (LMS) — MERN Stack, JWT | 2024 – 2025

- Full-stack LMS with course creation, enrollment, content management, and student progress tracking.
- Implemented JWT-based authentication with role-based access control for Admin, Instructor, and Student roles.

Gym Tracker Mobile Application — React Native, Firebase | 2024 – 2025

- Cross-platform mobile app (Android & iOS) for tracking workouts, fitness goals, and progress over time.
- Used Firebase Authentication and Realtime Database for secure login and live data synchronization.

Knapsack Visualization Tool — Python, DSA | 2024 – 2025

- Interactive step-by-step visualization of the 0/1 Knapsack problem using Dynamic Programming and Greedy approaches.
- Designed for educational use to help students understand algorithm trade-offs through animated comparisons.
